## WHAT HAS BEEN DONE ON STREETS

Report of Acting Superintendent of Streets

Acting Superintendent of Streets

George L. Ives has presented to the

board of public works a comprehensive

report of the work done on the streets

by the employees of the city. The report

in full is as follows:

To the Honorable Board of Public

Works:

Gentlemen—In accordance with a vote

passed, I submit a detailed statement of

work that has been done in this depart-

ment during the past six weeks, the

routine work consisting mostly of

street cleaning and repairing unpaved

streets.

A large amount of dirt has accumu-

lated on the streets since last fall, when

we stopped cleaning them; the bulk of

it is more especially on the top-dressed

streets near the center of the city, owing

to a long season of cold and freezing

weather; it has prevented us from

commencing to clean up earlier.

There have been 73½ days work done

from March 29 to April 30 with the

city's two double teams at sweeping,

watering, cleaning and repairing streets

and 29 days with the single team. I

would refer you to a special report

which I have made in relation to the

street cleaning and parts of the work

connected with it.

There have been 15 new crosswalks

constructed.

There have been 24 old ones repaired

and relaid.

There have been a number of repairs

made on the block pavements, where it

was needed, including work done on

parks and grading of sidewalks, of

which a detailed report of the entire

work done in the street department in

the past six weeks accompanies this re-

port, all of which is respectfully sub-

mitted.

## STREET CLEANING.

The block pavements are swept at

night on an average of two or three

times a week. It takes from seven to

nine hours to do the work as it should

be done. Some of the streets are very

uneven and if the broom is run too fast

it will not do the work as well and the

wear and tear on the machine would be

greater.

The sweepings are of little value for

filling-in purposes and for that reason

they are disposed of to the nearest

dumping ground that can be found (for

economy). They have been saved and

piled up at the foot of Laurel street

and used on our public parks for fer-

tilizing purposes. But there were many

complaints made about it being un-

healthy and as a consequence we stop-

ped putting it there.

The hardened streets are very seldom

swept, but the gutters are practically

kept clean, while the mud and dirt on

the surface is not removed until it be-

comes absolutely necessary. It can

be removed as often as it is on block

streets.

There has been a great amount of

building done in the center for the past

year or more and the carting from them

has kept our streets in a very bad con-

dition, owing to the large amount of

waste material that has been dropped

from the teams that were removing it.

The street department has had all this

to contend with, and as well the carting

of a large amount of dirt left on the

roadways where the electric roads have

been torn up their tracks and relaid them.

It cost more to clean off the mud from a

mile of a hardened street than to keep

three miles of a paved street swept and

cleaned.

When we clean a paved street we cart

nothing away but an accumulation of

light dirt and the streets are left clean

and healthy, while on a hardened street

we cart away a large percentage of the

wearing material in the form of mud,

which has to be replaced with crushed

stone in a very short time, especially on

the streets that are heavily traveled, to

keep them in a passable condition.

For an illustration—Crown street, be-

tween Church and State streets, was

hardened two years ago; since that time

we have carted upwards of 100 loads of

mud off it; Orange street, between Elm

and Crown streets, in proportion, street

street, more in proportion; West Chapel

street, from York to Norton streets, 175

loads this spring and a year ago 150

loads; Wooster street (only two years

old), over 175 loads.

If we should undertake to keep all the

mud carted away from off the above

streets it would require nearly double

the amount of labor to do it, hence more

expensive.

We have cleaned over 150 streets this

spring and carted about 1,500 loads from

off them. We have carted the material

off the hardened streets to the most

convenient dumping ground belonging

to the city, these dumping grounds be-

ing at a great distance. We have hard-

ened Lambert street with cinders, from

Howard avenue to Morris street,

which was much needed. We have fill-

ed in Crown street in proportion, street

with surplus dirt, from the Dixwell

avenue railroad, and street dirt from off

Dixwell avenue. We have filled up

North Bank street with nearly 150 loads

which we cleaned up from State street

and other streets in that vicinity.

Whitney avenue is now being cleaned

and we are carting the dirt that is there

onto the east side of Cammer street,

south of Whitney avenue, and filling up

the low sidewalk.

Whalley avenue is now being cleaned.

The dirt on this avenue we are carting

to the low place, corner of Nott street

and Whalley avenue, which is part of

the Boulevard roadway and which will

soon have to be graded.

All of which is respectfully submitted.

GEORGE L. IVES,

Acting Superintendent of Streets.
